

AMENDMENTS TO THE SPECIFICATION

Page 3, amend the first full paragraph to read:

The middle casing (2) is ~~also~~ a ring and has multiple holes (21) defined in a recessed area (23) to receive therein a corresponding one of the first pins (112) of the legs (11) of the top casing (1) and multiple second pins (22) extending out in a direction the same as that of the first pins (121).

Page 3, amend paragraph 5 (bridging pages 3 and 4) to read:

With reference to Fig. 2, when the dual-fan heat dissipater of the present invention is in assembly, the first pins (112) are inserted into the corresponding holes (21) of the middle casing (2) to combine the ~~first~~ top casing (1) and the ~~second~~ middle casing (2). Then the second pins (22) are inserted into the corresponding assembly holes (32) of the bottom casing (3) to combine the combination of the top casing (1) and the middle casing (2) with the bottom casing (3). Due to the provision of the recessed areas (23) in the middle casing (2), after the first pins
